

Help Your Customer Out Of A *Stinky Situation!*

SuperJet™

(Patent Pending)

SuperJet™ is a super heating muffer that raises the temperature of HURCO's LiquiSmoke™ to beyond its flash point giving a true atomization of the LiquiSmoke™ fluid. The result? A nearly 100% burn of the LiquiSmoke™ fluid, more accurate control of the smoke and a tremendous cost savings.

Efficient and cost effective, smoke testing has become a **worldwide standard** for finding leaks in sewer and plumbing systems. By forcing safe and clean LiquiSmoke™ through sewer and plumbing systems, leaks can quickly be detected as smoke escapes through problem areas.

Laboratory tested* LiquiSmoke™ is the safest and cleanest way to smoke test plumbing systems for both commercial and residential buildings. LiquiSmoke™ DOES NOT contain toxic compounds like "zinc chloride" – the active ingredient in smoke bombs.

LiquiSmoke™ has an indefinite shelf life and can be shipped year-round without a hazardous shipping document.

LiquiSmoke™ is about half the cost of smoke bombs, is easier to use and requires less labor to implement.

*Laboratory test results are available on our website at www.hurcotech.com

Power Smoker 2

High pressure cast aluminum fan - up to 700 CFM at 8.0 Static Pressure.

LiquiSmoke™ Canister with in-line filter and precision needle valve.

6' heavy duty 4" duct.

Honda 2 1/2 HP with oil alert. Electronic ignition, meets EPA & CARB 2000 regulation.
