

Engineered for Performance

HURCO Technologies provides the right tools to make your efforts safer, highly productive and more profitable.

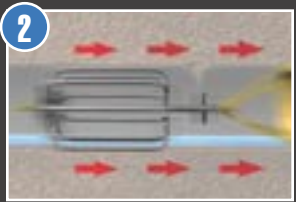

HURCO teams up its powerful RIPCORD™/Super RIPCORD™ with the lightweight Whistle Gauge for the fastest, safest deflection gauge on the market today.

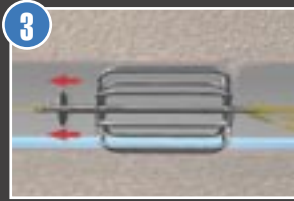

1
The deflection gauge parachute inflates when the RIPCORD or Super RIPCORD starts up.

2
The whistle gauge is pulled through the pipe, manhole to manhole, in a blazing **17 seconds or less!**

3
If the gauge becomes stuck, the rope is pulled back. The opposite end plate forces the gauge loose.

4
The gauge is simply pulled from the pipe and the pipe is repaired while you move to the next section.

Rope Reel

RIPCORD™

Whistle Gauge™ with TKO™ (Patent #6751881)

PERFORMANCE COUNTS

With the Whistle Gauge with TKO™

- The RIPCORD pulls the Whistle Gauge manhole-to-manhole in 17 seconds or less. Do 5 Days work in 1 -- More production means more profits.
- The Whistle Gauge with TKO's exclusive hammering action will eliminate the costs of digging up stuck gauges. Your crews can then spend their time on money making jobs.
- Avoid crawling into dangerous re-excavation work spaces, reducing liability and exposure to workman comp costs.

If any HURCO product does not perform exactly as we claim, let us know within the first 10 days after purchase and we'll refund your money.

Standard Deflection Gauge Testing vs Whistle Gauge Testing

Standard deflection testing

Deflection testing with the Whistle Gauge with TKO
17 seconds or less

Multi-Size Deflection Gauge

Hurco still offers the popular multi-size deflection test gauge. See our entire line of deflection testing products at our website.
