

SHORELOCK

- Provides 2000 PSI @ 3 GPM
- Stainless steel deadman control valve helps prevent corrosion to ensure it will perform when needed, every time.

Time saving. Labor relieving.

Our ShoreLock Pump eliminates the manpower required when using hydraulic trench shoring.

- Durable and dependable Honda or Briggs & Stratton engines for years of service.
- Triple plunger pump with adjustable unloader valve, Buena V-packings, and ceramic plungers.
- Stainless steel, quick activating deadman valve allows for immediate pressure to line.
- 12 gallon water tank with 6" fill.
- 10" solid, flat free tires to avoid punctures on the jobsite.
- All hoses are rated at 3000 PSI or greater, exceeding the operating pressure to help reduce the risk of failure.
